# WEEKLY NEWS ANALYSIS

# Russian Front Grows in Importance As Nazis Win New African Victory; Oregon, Canada Shelled by Axis Sub; Japs Gain Second Aleutian Foothold

(EDITOR'S NOTE-When opinions are expressed in these columns, they are those of the news analyst and not necessarily of this newspaper.) Released by Western Newspaper Union.

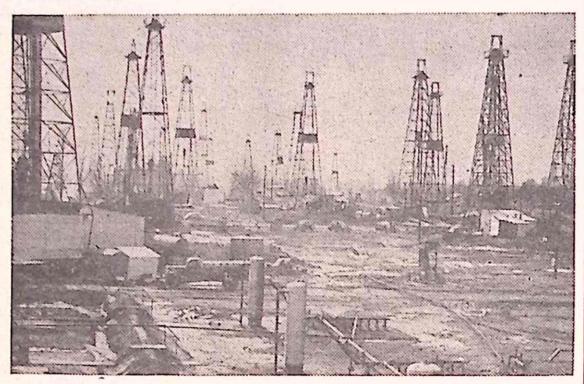

Photo shows oil wells located near Salem, Ill., which has been designated as the terminus for the proposed oil pipe line from Longview, Texas. The WPB announces that the cost of the project will be between 30 and 40 million dollars. Acute oil shortage and gasoline shortage in the eastern states will be considerably alleviated by the new line.

# RUSSIAN FRONT:

# Increased Importance

With the fall of Tobruk in Libya the fighting on the Russian front took on added importance for it became increasingly clear that if the United Nations were going to fight Hitler to a standstill the Soviet forces must continue to occupy the major portion of Nazi armed strength.

Soviet soldiers were doing just that. Even as the British were admitting the loss of their Libyan stronghold, a report from Moscow took the optimistic note that with the continued material aid of Brit- few days enabled discovery of the possible. ain and the United States the Rus- occupation of Kiska. sians would be able to hold out against Germany.

While an official Russian communique admitted a German breakthrough at Sevastopol, Soviet troops had blasted their way across the Donets river in the critical Kharkov area and recaptured a number of localities in a terrific counterattack. Earlier, two German regiments with heavy air and tank support had crossed the river in a violent attack and forced the Russians

The German success at Sevastopol came only after huge losses, according to the Russian official version which admitted: "In the Sevastopol sector of the front our troops repelled repeated furious German attacks. At a cost of enormous losses the enemy succeeded in driving a wedge in our defensive positions."

# WEST COASTS:

# Shelled

Almost four months to the day after a submarine had shelled the California coast, another U. S. state, Oregon, felt the impact of enemy shells. The more recent shelling took place against the shoreline north of Seaside, Ore., just south of Astoria, at the mouth of the Columbia river.

The Fourth Army and Western Defense command announced the firing of six to nine shells by an unidentified craft near the midnight hour. No damage nor casualties were reported. Although the army did not immediately identify the attacking vessel it was believed to be a Jap submarine.

This conclusion was reached after the Canadian government had announced that about 24 hours before the Oregon attack a submarine had landed shells at the government telegraph station at Estevan Point, Vancouver island.

This was the first time that an enemy submarine had attacked shore installations in Canada and the first time in Canada's history that enemy shells had landed on her soil. Canadian officials said that while one of the shells landed near enough the telegraph station to "shatter windows" the other missles "fell harmlessly on the beach."

The U. S. army's first brief announcement of the Oregon attack indicated that the firing had lasted about 15 minutes. Earlier residents of Astoria had reported hearing between 10 and 16 shots fired at sea and said they could hear the shells back across the desert to Egypt's whistle over head. Still another report said that an Astoria resident siege in April, 1941. The garrison had sighted a submarine off the was kept in action by the British driving from the north Honan prov-

## JAP FOOTHOLD: On Kiska Island

Japan gained a second foothold in the Western hemisphere when forces were put ashore at Kiska island to establish a base on that Aleutian island less than 600 miles from the navy's base at Dutch Harbor.

The Japanese, operating under cover of fog, were able to establish their base. The occupation was not a surprise. Kiska is approximately 175 miles east of Attu island, which the navy announced on June 12 had been occupied by the Japanese. A break in the weather within the past

A navy communique said that "Tents and minor temporary structures were observed to have been set up on land." Kiska has a fair harbor, the site of a former coaling station for ships. Attu has few facilities for ships of any size.

In Honolulu, Lieut. Gen. Delos C. Emmons has urged all non-residents not engaged in essential war work to leave for the mainland as soon as practicable and at the same time warned that Japan might attack Hawaii at any time.

# TOBRUK:

# Its Aftermath

When the fall of Tobruk was officially confirmed by the British, Allied plans for a second front received a setback. Egypt and Suez are threatened by Axis forces, under the leadership of Nazi Marshal Erwin Rommel.

According to German and Italian communiques, 25,000 British soldiers and several generals were captured. These figures almost duplicate the number of Italians

GEN. SIR ARCHIBALD WAVELL It was 17 months ago.

captured when Tobruk surrendered to the British in January, 1941.

Australian and British troops moved into Tobruk 17 months ago when Gen. Sir Archibald Wavell was driving across Libya. The Italian troops offered little resistance, although they burned much of the material in the city.

Following the Italian defeat, German troops were sent to Africa and a strengthened Axis army drove borders. Tobruk was placed under

## PARITY: Fight Goes On

Farm, church and labor groups united in a move to back President Roosevelt against a legislative bloc which is opposed to the administration's plan to sell government-owned wheat and corn below parity prices.

In a letter to the White House, these groups said that the success of the President's program for farm security in this regard was essential for the winning of the war.

Included in the groups backing the letter were the National Farmers union, the American Federation of Labor, the Congress of Industrial Organizations, the Railway Executives association, the National Catholic Rural Life conference and the Federal Council of the Churches of Christ in America.

This joint move was believed to be part of a plan being set up in opposition to the "high price through scarcity" concept backed by the American Farm Bureau federation, headed by Edward A. O'Neal. The Farm Bureau federation is reported to have been successful in withholding approval of the President's formula for selling government-owned wheat and corn at 85 per cent of

### TAXATION PROGRAM: Behind Schedule

To ease the taxpayers' burden in 1943, the treasury department proposed to congress a modification of its plan to withhold federal taxes at the source. Under the plan the treasury would collect 5 per cent of the taxable income starting on January 1, 1943, instead of 10 per cent, would collect 15 per cent in 1944, and 10 per cent in 1945.

Earlier the treasury department proposed a 100 per cent war "supertax" to carry out President Roosevelt's recommendations for limitation of individual income to \$25,000 a year after payment of all taxes.

The President told the press that taxation provisions of his antiinflation program were running slightly behind schedule and that, in his opinion, the bill should be split into sections in order to get part of it into effect as soon as

# MORE ROYALTY:

### In Washington

Second monarch in ten days to visit Washington and hold conversations with President Roosevelt was the 19-year-old boy king of Jugoslavia, King Peter II. He arrived in the capital by plane and was accompanied by Foreign Minister M. Nintchich.

Main topics of discussion with the President were Jugoslavia's unrelenting guerrilla warfare against Germany and the effects of a master lend-lease agreement for his country which would provide for after-the-war understandings and collaboration.

King George II of Greece had left the capital before King Peter arrived and Queen Wilhelmina, ruling head of the Netherlands, was on her way to Washington, via Canada, at

# WAR MANPOWER:

# Staggering Total

The effect of the war upon everyday life was emphasized in a statement of the War Manpower commission, which said that the goal for men in the armed forces is six to seven million men by the end of 1943, and "eventually" may be 10

By 1944, at least 20 million workers will be needed in war production and transportation. The 1943 crop will be harvested by 12 million workers.

Chairman MacLean of the President's Committee on Fair Employment Practice stated that in 1944 high school enrollment might be reduced by 40 to 50 per cent, college enrollment by 70 to 80 per cent, and half the nation's schools may be closed due to increasing needs for war workers.

# CHINA:

# Rocks, Grenades

A rough mountain pass along the Honan-Shansi border north of the Yellow river was the scene of a bitter struggle as poorly equipped Chinese troops repulsed the seventh attempt of the Japanese to break through.

Fighting with rocks, hand grenades and machine guns against 10,000 Jap troops supported by planes and heavy guns, the Chinese are extracting a bitter toll from the enemy. Spokesmen claimed that the Chinese still were holding a 50mile gap along the Chekiang-Kiang-si railway in the area south of the Yangtze river.

The Japanese opened a new of-

# FIRST-AID to the AILING HOUSE

by Roger B. Whitman Roger B. Whitman-WNU Features.

WALLPAPER CAN BE PAINTED W HEN wallpaper is old and dingy the freshening of the rooms gives a choice between stripping it off and replacing it, putting new wallpaper over it, or painting. Of the three, painting is the simplest, but with the warning that it is not always practical. For one thing, the liquid of the paint may strike through the wallpaper and loosen the paste, and this is especially likely to happen if the wallpaper is bulged and shows other signs of not being firmly attached. With wallpaper in good condition, painting is possible when the conditions are right. In the first place, the paint must be of a kind that dries quickly, so that there is the least possible chance that the paste will be loosened. Also, the paint should have enough body to cover the wallpaper design with a single coat. A good type of paint for this purpose is a top quality calcimine, which comes as a powder to be mixed with water, or a casein paint that comes as a paste to be thinned with water to painting consistency. Painting should be done on a warm and dry day, with good ventilation, for the more quickly the paint dries, the less chance there will be for it to strike through and soften the wallpaper paste. Painting can also be done at a time when the heater is going and the house is thoroughly warm.

#### Lamp Support

Question: I want to hang an oil lamp from an ordinary plaster ceiling of an inexpensive frame house. The lamp weighs about six pounds. How can I be sure that the supporting screw will go into something solid, rather than into the space between two laths?

Answer: At a hardware store you can get what is known as a togglebolt, which will give ample support, because in going through the space between two laths, it acts as a bridge across them. Another method would be to screw a strip of wood six inches or so wide and a foot or more long to the ceiling, where the screws would go into several laths. The toggle-bolt would be neater, because it would not

# Sun Deck Floor

Question: We are planning to have a sun-deck cut into our third floor roof. What type of flooring would you recommend? We plan to cover the deck with canvas. What weight canvas should we use?

Answer: Tongue-and-groove fir, mon flooring grade is generally used. The boards should be seveneighths of an inch thick and not over four inches wide. Use a type of canvas made especially for roofing purposes. Roofing canvas manufacturers furnish complete directions on the correct method of laying a canvas roof.

# Difference in Temperature

Question: There is a difference of about 15 degrees in the temperature of our living-room taken near the floor and the temperature taken near the ceiling. Naturally the heat goes up. Is there any simple way of equalizing the room temperature? Hot water heat is being used.

Answer: The best way to get even distribution of heat in the room is to run a small electric fan set on the floor and blowing into the lower part of a radiator.

# Log Cabin

Question: The pine logs of my cabin have been shaved. How can I treat them for preservation and to retain their whiteness? How long should logs season before being

Answer: Two coats of spar varnish will act as a preservative and will maintain light color for some time. However, the logs will darken with age, which cannot be avoided. One winter's seasoning should be

# Inlaying Mahogany

Question: I should appreciate your advice as to what glue would be best to use in inlaying a mahogany table that I am making,

Answer: Casein glue or a glue made with a synthetic resin, applied according to the manufacturer's directions, should give good results. Lumber dealers who handle plywood should be able to tell you about the synthetic resin glue.

# Cracking Down on Rats

One of my correspondents writes that he foiled some aggressor rats who were trying to invade his house by nailing pieces of tin onto his porch at ground level. These pieces coast. Washington and Oregon had dimouts of their coasts at the time the sea lanes for supplies and re-inforcements.

Ince. They succeeded in pushing the coasts. He also treated his garage in the same way and since then has had no more trouble with has had no more trouble with rats.

research in the making of synthetic rubber. Dr. Carver refused. He said he had too much to do on his peanut research, and wrote: "God didn't charge for his work in making peanuts grow, so I won't charge for

Dr. Carver, at 78, now joins the experimental laboratories of the Ford Motor company at Detroit. It was in 1938 that Henry Ford visited Dr. Carver at Tuskegee institute, and they since have become warm personal friends. Both Mr. Ford and Mr. Edison were deeply interested in synthetic rubber. It is not unlikely that rubber was discussed on that 1938 visit and it is a wide open guess that Henry Ford has taken an even more timely interest in rubber and has enlisted the services of one of the greatest living authorities and skilled miracleworkers in plastics and syntheticsthe aged Dr. Carver.

Dr. Carver never has patented any of his innumerable processes, or gained a cent from them. They include making peanuts a \$61,000,000 crop and developing from them more than 300 saleable products, including not only foods, but paints, stains and linoleum. Dr. Carver was born in slavery, near Diamond Grove, Mo. He was traded for a horse, found his way into freedom, added scores of millions to the annual crop output of the South.

He was 20 years old before he learned to read or write, and, with this new and prized equipment walked and worked his way to Minneapolis, Kan., and odd-jobbed his way through high school and through the Iowa State college of agriculture and mechanical arts. Soon after his graduation, he joined the faculty of the above college and went to Tuskegee institute in 1896, where he pine or spruce flooring, No. 2 com- is now director of the department of agricultural research. Simpson college gave him an honorary degree in science, the Royal Society of Arts of London voted him membership and he was awarded the Spingarn medal in 1923 and the Theodore Roosevelt medal in 1939.

He is a kindly, stoop-shouldered old man, with white hair and ironrimmed spectacles. He is unmarried and deeply religious. He is apt to answer questions about his work by quotations from the Bible.

REAR ADMIRAL ROBERT C. GIFFEN, commanding our navy task force, joining the British to keep ship lanes clear and blockade

#### Admiral Giffen Old Germany, had the same Hand at Sweeping job in the

Sea Lanes of Foes First World war. Here's the navy's official report on his performance:

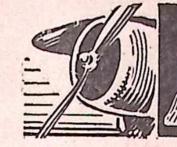

"Capt. Robert C. Giffen was awarded the Navy cross for distinguished service as commander of the USS destroyer Trippe, escorting and protecting vitally important convoys of troops and supplies, and in offensive and defensive action vigorously and unremittingly prosecuted against all forms of enemy naval activity."

Unofficial accounts of the day went into much more detail about the young captain's skill and courage in chasing submarines through mine-strewn waters. Toward the end of the war, he commanded the USS Schley in the eastern Mediterranean. In 1927, he commanded the USS Sacramento, was commended for distinguished service with the Asiatic fleet and in 1928 and 1929 commanded the destroyer division of that fleet. His other honors include the Victory medal, with destroyer clasp, the Yangtze service medal and the Navy Expedition-

ary medal. Admiral Giffen was born in Westchester, Pa., in 1886, studied at De La Salle institute in Chicago and Notre Dame university and was admitted to the Naval academy from Nebraska in 1903. In 1937 he took command of the USS Savannah.

# SHE LOYED ASPY OBELL BY SYLVIA TAYLOR WN.U.RKase

CHAPTER XIV

Karl was dressed in white. In appearance and manner he was as smooth and impeccable as always. But the same qualities that once charmed Joan now disgusted her as she asked coldly, "Where is Paul?"

"Do you expect me to tell you?"
Karl parried.

Where was Paul? This subject held her interest most. She dared not think what might become of her without him.

But the day passed, the night, the next day, and still she had not seen him. And the next morning as she saw Karl coming on deck, she demanded, "What have you done with Paul? I want to see him."

"All right," Karl agreed surprisingly. "He summoned a sailor and spoke to him in German.

A few minutes later Paul appeared. His coat and tie were gone and his shirt was open at the throat. He looked tired.

Karl spoke rapidly in German, then suddenly turned on his heel and walked away.

"Oh Paul!" Joan gasped. "Are you all right?"

"I'm fine," Paul said grimly.
"Karl's just been trying to persuade me to join his little group. Both of us, for that matter. He thinks we'd be valuable to him in his spying business."

Then he glanced at her with a smile. "You sound almost as if you care."

"I do," Joan said. And suddenly she realized that she did care. That she cared terribly what happened to Paul O'Malley.

Five more days passed as the weather became increasingly uncomfortable.

"We're probably off the coast of Mexico," Paul said as he stood at the rail looking into the vast expanse of blue sky and water.

Without turning his head, Paul said in a low voice, "I have something to tell you. Do you know which sailor is called Thomas?"

"I think so. The one who brings our meals."

"Right. It seems Karl has something on him, forced him into service on this ship by blackmail. He's promised to help us, when the time comes."

"What time?" Joan asked, feeling suddenly chilled in spite of the tropical sun.

"If everything goes as I expect, it should be within two or three days."

"You still don't know how Karl plans to get rid of those papers?"
"Submarine," Paul said briefly.
"Thomas tells me we're to contact it within the next twenty-four hours."

"There's a ring around the moon," Paul observed. "We're going to have some bad weather."

"Anything would be better than this." Closing her eyes against the heat, Joan leaned her head against the chair.

When she felt a hand over hers, she started. "Oh . . . Paul . . ."
Color flooded her cheeks.

"Tran " he said simply "don't

"Joan," he said simply, "don't you know I'm in love with you?"
Relief and joy flooded her heart.

Relief and joy flooded her heart.

Fatigue fell like a mask from her young face.

"I've been in love with you ever

"I've been in love with you ever since the first day I saw you," Paul went on in his quiet voice. "But there was Karl . . ."

"Oh darling, that wasn't real. I didn't love Karl. I just thought I did. You must believe that, Paul!"
"Of course I believe it, honey,"

"Of course I believe it, honey,"
he said. "If I didn't, do you think
I'd be telling you this? We O'Malleys are cagey people."

She smiled in the darkness.

"If we ever get out of this mess,"
Paul continued seriously, "will you
marry me? It's not an easy life, you
know, Joan. I'm gone a great deal
and my job's dangerous. I haven't

"You have all I want," Joan assured him. "And Paul, we've got to get out of this now. There's so much

be separated."

Joan felt Paul's warning hand

upon her arm but she burst out,

"What do you mean?"

"I have been listening to your charming conversation," Karl told her. Joan could see the outline of his white suit in the darkness, the glow of his cigarette. "Since you seem so well informed about my plans, it might interest you to know that when that submarine leaves this ship, Paul will be on it."

ship, Paul will of that?"

"No! You can't do that?"

She could imagine his smile as he said, "I am really quite jealous, Joan, that you can transfer your affection so quickly, I would prefer fection so quickly.

that Paul is safely out of the way so that there is nothing to interfere with our friendship."

Paul's hands clinched on the arms of his chair, but he said nothing. Joan understood then that it was better to pacify Karl than to antagonize him further.

Her hand grasped Paul's tightly as Karl disappeared around the corner of the deck. "Is he bluffing?" she whispered.

"Of course he is," Paul replied calmly. "It would be easier to get rid of me entirely than to put me on another boat. I wouldn't be any asset to Karl on a submarine."

Joan slept little that night. The ship began to roll and shudder as it met the seas that increased as the night went on. A sharp wind swept the deck. Black clouds raced across the moon and the sea splashed and hissed as it lashed over the prow.

Paul's finger tapped on the wall.

Joan moved closer to the thin boards that separated them and called, "What is it?"

She did not understand his reply but realized that his door was being unlocked.

Presently Paul's head appeared in her door. "Thomas is here and

On deck, Joan had to cling to Paul to prevent the wind from sweeping her off her feet.

knows where those papers are. We're going to get them," he said. "Karl will find out," she warned.

"Karl and the captain are drinking below. They won't bother us."
"Take me with you. Please! I'm

afraid."
Paul hesitated, then said, "All right. Maybe it would be better."
On deck, Joan had to cling to Paul

On deck, Joan had to cling to Paul to prevent the wind from sweeping her off her feet. The decks were slippery from the spray and the waves rose like black liquid mountains. As they proceeded cautiously, Joan dared not look out into the night. It was total blackness, and sky and water seemed blended into one evil force from which came the howling wind and spray.

At last Thomas unlocked a door and crossed the room. "They're in here," he whispered, indicating a small wall safe. "I know how to open it."

open it."

He handed the papers to Paul.
"Do what you like with them! I hate Karl Miller!" In the glow of the flashlight his eyes gleamed.

Paul rapidly sorted them.
"What are you going to do then?"
Joan asked.

"I'm going to change them—the plans for the bombing plane at least."

"We should meet the submarine tomorrow," Thomas said, looking fearfully over his shoulder. "But with this weather we may be off our course."

Paul seated himself at the small wooden table and handed a flashlight to Thomas. "Hold it as steady as possible," he ordered. From his pocket he drew a small bottle, a

brush, pen and ink.
"What are you doing?" Joan asked, watching the grotesque shadows cast on the wall as Paul's fingers moved deftly over the paper.

"When I get through with these plans they won't know whether it's a bombing plane or a washing machine."

Once Thomas opened the door to listen, but only the wind greeted them, blowing the salt spray into their faces, and he shook his head. "This is going to be a bad one," he predicted, forcing his shoulder against the door to close it.

Paul finished his work and replaced the plans carefully in the safe. Joan was surprised to see him put the other papers back in their respective envelopes.

"These papers are probably going to Europe," Paul explained as he shut the safe.

Thomas nodded. "That's right. That's the way Karl always does it. Then they can't prove anything." Paul threw the circle of his flash-

light upon the door. "I can prove it this time."
"That's what some of the others

thought," Thomas whispered, "but I've never seen anyone double-cross Karl and live to tell about it!"
"Let's get out of here," Paul said, taking Joan's arm.

The three of them made their way back and crowded into Joan's small cabin. Thomas stood by the door listening. "I guess Karl won't come on deck on a night like this," he said.

"There's nothing to do now but wait for morning," Paul said. "And I want you to get some sleep, Joan." He put his arms tenderly about her shoulders. "Will you try, honey? Thomas and I will be right in the next cabin. Knock on the wall if you need me."

Wide-eyed, Joan lay awake listening to the thunder and the wild hiss of water as it flooded the deck. The sensitive ship seemed like another human being as it fought its valiant battle against the storm. Creaking and groaning, it pitted its strength against the double blows of wind and wave.

Dawn. The sea had subsided but rain still fell from clouded skies into the gray water. Outside Thomas had reappeared at his post and paced the wet deck with measured tread, his sharp eyes searching the seas. It was seven o'clock when Paul and Joan finally went to the small lounge which served as a dining room, and Thomas brought their breakfast.

"Any news?" Paul asked as Thomas poured the coffee.

"Karl is with the captain," the sailor reported. "They've communicated with the submarine by radio. We should meet them in three or four hours."

Paul rose. "Do you think you can keep Karl occupied in the captain's quarters for a few minutes? I'm going to the radio room."

"I'll try. But the radio operator is a tough guy. Doesn't speak a word of English either. He'll turn you right over to Karl."

Paul smiled. "I don't think so."
"Be careful," Joan begged, knowing that to ask for an explanation would be useless.

Paul bent down to kiss her. "Don't worry, dear. I know what I'm doing. I'll be back soon."

When he had gone Thomas paused in the doorway. "He should be more careful. He doesn't even carry a gun!"

"Karl took his gun away, and it he had another Karl would find it."
Thomas came closer. "But if you had a gun, Karl wouldn't suspect."
"What do yoù mean?" Joan whis-

Thomas touched his pocket. "I have one here. I've had it for the last month, but it doesn't do me any good. If I gave it to Mr. O'Malley, Karl would find it but you might be able to hide it away. May come in

handy."

Joan was thinking rapidly, not of herself but Paul. It would be a safeguard for both of them. "Give it to me then," she told Thomas.

He handed it to her and she put it

in her pocket.
"Good luck!" he said and was

Joan did not tell Paul about the gun. She was afraid he would not want her to have the responsibility. She remembered the last occasion she had held a gun in her hand. The time Karl shot Eric and made her pick up the gun to have her incriminating fingerprints on it.

"Why so quiet?" Paul inquired. Absorbed, she had not heard him return.

She smiled. "Nothing, darling.

Just thinking."

"About me, I trust."

He drew her into his arms and kissed her. "I love you, Joan!"

She felt as though his love built a high wall between her and the rest

of the world.

"I'm afraid you'll never have an easy life," Paul warned. "I'll be away a lot and sometimes I won't be able to explain where or why. You'll have to trust me."

By VIRGINIA VALE
Released by Western Newspaper Union.

LD phonograph records are now being collected for our fighting men. The movement is headed by Kay Kyser, Kate Smith and Gene Autrey, and endorsed by Ginny Simms, Lily Pons, Benny Goodman, Guy Lombardo and practically all the other top notchers in music. Used and broken records will be converted into scrap and sold, and new records bought for U.S. army camps, forts, naval stations and marine bases here and overseas. The American Legion and the Legion Auxiliary will do the picking-up. If you've got a man in the service, you know what a fine thing this is. -\*-

Columbia has two of last season's greatest grid greats, Bruce Smith of Minnesota and Frankie Albert of Stanford, on the lot in films based on their own lives. Two All-American teams will figure in each picture.

RKO added a potential 26,000,000 customers for its "Sweet and Hot" with the announcement that two highly popular coast-to-coast programs will appear in the forthcoming Tim Whelan musical, which co-

LUCILLE BALL

stars Lucille Ball and Victor Mature. Charles Victor and his "Court of Missing Heirs" program, and Ralph Edwards and the "Truth or Consequences" company have been signed up for the picture.

Director Alexander Hall sent a camera crew around the city to photograph kissing shots for a trailer for "They All Kissed the Bride." He was so impressed by a girl whom the camera caught kissing a young man good-by at a railway station that he offered her a screen test. She was Evelyn Scott, of Salt Lake City. She accepted, but didn't show up—she'd married the man she kissed!

Betty Rhodes, one of the top singing stars in radio, will be Bing Crosby's leading lady in his next Paramount picture, a radio story tentatively titled "Manhattan at Midnight." She has her own half-hour
weekly radio show, singing over a
90-station network.

Susan Peters is the happiest girl in Hollywood. She was just one of a hundred ambitious young actresses, with a small role in "Tish"—and then suddenly she had the second feminine role in "Random Harvest," starring Ronald Colman and Greer Garson, and a new long-term contract with Metro to boot. A local girl, she'd been trying for two years to get a start in pictures.

Recently Jack Holt visited his son Tim on location for "Pirates of the Prairie." Seeing some cowboy extras he'd played with, Jack sat down on a bench in front of a saddle shop to talk with them. A shot was made of Tim riding by—and later it was discovered that, by mistake, Jack appears in his son's picture.

Lana Turner is cheering—she won the dramatic role of the young wife in Metro's "Marriage Is a Private Affair," based on the book of that name. It's a rich and sympathetic role, the sort that young actresses dream of getting.

Amelia Earhart's favorite racing plane, the one in which she broke several national records, is being used by Pat O'Brien in his role of a dare - devil pilot for Columbia's "Flight Lieutenant." It had been rented for spectacular film scenes in which O'Brien is supposed to make test dives. It was not until O'Brien saw Miss Earhart's signature scratched on the instrument panel that he learned the plane had been hers.

# Here's a Gentler Way to Treat Constipation!

Do you think you have to take

harsh cathartics or purges every time constipation makes you miserable? You don't—if you are one of those people with normal intestines who suffer from constipation due to lack of "bulk" in the diet. There is a pleasanter and gentler way. All you do is eat KELLOGG'S ALL-BRAN regularly and drink plenty of water. ALL-BRAN is a crisp, delicious cereal. It works quite differently from many medicinal laxatives. They work by prodding the intestines into action or by drawing moisture into them from other parts of the body. But ALL-BRAN acts principally on the contents of the colon, helping you to have easy and normal elimination. ALL-BRAN is made by Kellogg's in Battle Creek. If your condition is not helped by this simple treatment, see a doctor.

WNU-S

Kidneys Must

26-42

Work Well-

24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood.

If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail

whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling.

Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence.

DOAN'S PILLS

# New V-Mail Service for Soldiers Who Are in England and Ireland

# Valuable Cargo Space Will Be Saved by New Method.

The new and expeditious mail in operation between U.S. army service known as V-Mail is now units in England and Northern Ireland and the United States.

Under this new service, V-Mail from U. S. forces in those areas is dispatched to a central station where, under control of the war department, it is first censored and then photographed on small rolls of microfilm.

The microfilm rolls are then dispatched, under the control of the war department, to this country, where they are developed and photostatic copies are made on special forms which are placed in window envelopes and are presented by the war department to the postal service and sent through the regular mails to their addressee.

Saves Cargo Space.

Through the use of the microfilm valuable cargo space is saved by eliminating bulk mail shipments and faster and safer transportation will be provided by air.

The inauguration of V-Mail service follows many months of study and preparation on the part of the war, navy and post office departments.

Special stationery has been provided U. S. troops in England and Northern Ireland containing space for the name and address of the addressee and also the sender, together with the date and place for the censor's stamp.

At the present time, V-Mail is being handled on a one-way basis

# Here's One Lawmakers Failed to Anticipate

TOLEDO.-Theron Brown, assistant police prosecutor, searched the Ohio law books in vain for a solution of the legal problem given to him by a Toledoan who telephoned for advice on an unusual situation that confronted him.

The Toledoan said that he is crippled and that his wife does not approve of the places he goes in his wheel chair and so removed the wheels and hid them.

"Have I any legal recourse?" the man asked.

Mr. Brown said he could find no criminal law covering the subject. but advised the unhappy husband that he could get the matter settled in domestic relations court.

# Accommodating Top Kick Reassures Errant Charge

FORT DEVENS, MASS .- Sergt. Jack Young received a wire from one of his men, a private who was overstaying a three-day pass.

"No alibi except weather and good time. Prepare doghouse. Arrive Friday"-ran the honest private's message.

And with equal frankness Top Sergeant Young answered by telegram, collect:

"Doghouse prepared. See you Friday, son."

# BY PHYLLIS BELMONT

My friend and I were in a restaurant when the National Anthem was played over the radio. Several people around the restaurant stood at attention, but as I have been told it is not proper unless you are in the presence of the orchestra, we remained seated. I felt somewhat embarrassed and in these troubled times I think it important to know the proper thing to do.

Answer—Technically you should stand at attention only when you are actually in the presence of an orchestra or band, or whatever musical instrument is playing the "Star Spangled Banner." If you hear the music over a microphone you need not stand except when it is played at public gatherings, theaters, meetings and the like.

In these troubled times, and with our country at war, you would be wise to stand at attention whenever you hear the National Anthem, except possibly in your own home, or in the home of friends.

# UNIFORM INTERNATIONAL PUNDAY

IMPROVED \*\*\*\*\*\*

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute of Chicago. (Released by Western Newspaper Union.)

# Lesson for July 5

Lesson subjects and Scripture texts se-lected and copyrighted by International Council of Religious Education; used by permission.

## GOD THE CREATOR

LESSON TEXT-Genesis 1:1-5, 24-31; 2:1. GOLDEN TEXT-In the beginning God created the heaven and the earth.-Genesis

What is to become of this world? That is the question on the mind and lips of everyone as they see all mankind engaged in a struggle which bids fair to wipe out everything called civilization.

In such a time it is good to remind ourselves that man did not make this world, nor is it the product of natural forces. God made it.

God, who is eternal, infinite, knowing all from the beginning, is not moved by the impulses of the moment nor staggered by the catastrophes of a day. He made the world. He made man. He had a plan for them, and still has a plan which in due season He will work out for His own glory.

I. God Made the Heavens and Earth (vv. 1-5, 24-25).

The plain biblical account of creation-"In the beginning God"stands as a dignified, satisfactory, intelligent explanation of the origin of things, and in bold contrast to the confusing and almost unbelievable theories of men.

The best of scientists admit that they know nothing of the origin of things, and some even confess that they never will know. The answer to the query with which every human philosophy opens is the affirmation with which the divine account in Genesis opens-"In the beginning God."

Space forbids full discussion of the account of creation, but a study of it will reveal its beautiful order. symmetry, and completeness. Science, when it gets beyond theories to facts, finds them confirmed by Scripture. Please do not reverse that and speak of science confirming Scripture. If my watch does not agree with the time of the stars, it is the watch that must be reset.

II. God Made Man in His Own Image (vv. 26-30).

Although man, under the control of Satan, does not give much ground for the observation, it is nevertheless true that he was made in the likeness and image of God. Because that is true, we never give up hope for him. That image, no matter how deeply defaced by sin, still may be touched by redeeming grace and restored to fellowship with God.

The likeness and image of God in man undoubtedly refers to a moral and spiritual likeness. Man is a living soul with intelligence, feeling, and will power. He is a moral being, knowing the difference between right and wrong. He is a self-conscious, personal being.

Observe that the family was established as the center of man's life on earth, as God gave him a "help meet unto him." Woman was taken "not out of man's head that she should rule over him; nor out of his feet to be trampled upon; but out of his side to be equal with him, under his arm to be protected by him, and near his heart to be loved by him" (Matthew Henry).

The decay of family life and the substitution of social or civic units as the basis of life have led to disastrous results. Not only do we need a revival of religion, we also need a revival of the home life of the nation.

III. God's Creation Was Complete and Good (1:31; 2:1).

When men do recognize the hand of God in creation they all too often seem to feel that what He made was very limited and defective. It would almost seem that God ought to be grateful that man has been so clever about perfecting His work, developing it and making it useful. As a matter of fact, God who had all knowledge and whose standards are higher than man's standards could possibly be, looked over His creation and "behold, it was very good" (v. 31). It was a "finished" job (2:1).

Man has destroyed much of its beauty. Sin came in and marred the whole creation. What man's inventive cleverness has developed of the possibilities of this world is only a minute fraction of what is yet available. Instead of boasting, man might well be ashamed of the pathetic slowness with which he has

"thought God's thoughts after Him." Instead of fighting and destroying, he ought to give his energies to building, developing, and above all, to loving God with all his heart and his neighbor as himself.

#### THE MERRY LITTLE BREEZES WORK HARD

THE Merry Little Breezes almost shouted aloud with delight when they saw Farmer Brown's Boy drop Grandfather Frog to feel for his handkerchief and wipe out the dust which they had thrown in his eyes. Then he had to climb the fence and chase his hat through the garden. They would let him almost get his hands on it and then just as he thought that he surely had it they would snatch it away. It was great fun for the Merry Little Breezes. But they were not doing it for fun. No, indeed, they were not doing it for fun! They were doing it to lead

Grandfather Frog. Just as soon as they dared they dropped the hat and then separated and rushed away in all directions across the Green Meadows, over to the Green Forest and down to the Smiling Pool. What were they going for? Why to hunt for some of Grandfather Frog's friends and ask their help. You see the Merry Little Breezes could make Farmer Brown's Boy drop Grandfather Frog but they couldn't untie a knot or cut a string, and this is just what had got to be done to set Grandfather Frog free, for his hind legs were tied together. So now they were looking for some one with sharp teeth who thought enough of Grandfather Frog to come to help

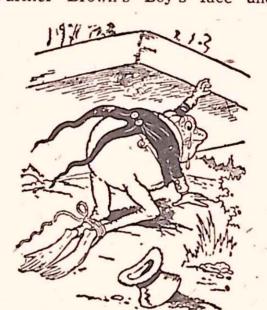

One thought of Striped Chipmunk and started for the old stone wall to look for him. Another went in search of Danny Meadow Mouse. A third headed for the dear old briar patch after Peter Rabbit. A fourth remembered Jimmy Skunk and how he had once set Blacky the Crow free from a snare. A fifth remembered what sharp teeth Happy Jack Squirrel has and hurried over to the Green Forest to look for him. A sixth started straight for the Smiling Pool to tell Jerry Muskrat. And every one of them raced as fast as he could.

All this time Grandfather Frog was without hope. Yes, sir, poor old Grandfather Frog was wholly in despair. You see, he didn't know what the Merry Little Breezes were trying to do and he was so frightened and confused that he couldn't

#### think. When Farmer Brown's Boy dropped him he lay for a few minutes right where he fell. Then right close at hand he saw an old board, and without really thinking he tried to get to it, for there looked as if there might be room for him to hide under it. It was hard work, for you know-his long hind legs, which he

uses for jumping, were tied together. The best he could do was to crawl and wriggle and pull himself along. Just as Farmer Brown's Boy started to climb the fence back into the Long Lane, his hat in his hand, Grandfather Frog reached the

old board and crawled under it. Now when the Merry Little Breezes had thrown the dust in Farmer Brown's Boy away from Farmer Brown's Boy's face and

It was hard work, for, you know, his long hind legs he used for jumping were tied behind him.

snatched his hat he had dropped Grandfather Frog in such a hurry that he didn't notice just where he did drop him, so now he didn't know the exact place to look for him. But he knew pretty near, and he hadn't the least doubt but that he would find him. He had just started to look when the dinner horn sounded. Farmer Brown's Boy hesitated. He was hungry. If he was late he might lose his dinner. He could come back later to look for Grandfather Frog, for with his legs tied Grandfather Frog couldn't get very far. So with a last look to make sure of the place Farmer Brown's

Boy started for the house: If the Merry Little Breezes had known this they would have felt ever so much better. But they didn't. So they hurried as fast as ever they could to find Grandfather Frog's friends, and worked until they were almost too tired to move, for it seemed as if every single one of Grandfather Frog's friends had taken that particular day to go away from home. So while Farmer Brown's Boy ate his dinner, and Grandfather Frog lay hiding under the old board in the Long Lane, the Merry Little Breezes did their best to find help for him.

Lieut. Henry Fitts, 25, of Macon, N. C., first publicly acclaimed hero of the battle between American air arms and Jap fleet off Midway island. He dropped the bombs which sank a Jap aircraft carrier.

# Mourning Outfit

Dressed in his German bund storm trooper's uniform, Karl Geiger, 59, of Brooklyn, leaves the federal court building after a hearing. He was arrested as he left a Brooklyn funeral parlor, wearing this outfit. Geiger explained that he and a friend, Eugene Habel, had made a uniform.

# Sick Soils Have Effect on Animals

# Earth Should Be 'Factories,' Not Mines

By DR. WILLIAM A. ALBRECHT (Department of Soils, College of Agriculture, University of Missouri.)

That sick soils will not build healthy animals any more than they will produce sturdy field crops is significant in view of our national tendency to combat soil erosion by allowing much of the fertility-depleted soil to go back to grass.

In place of giving attention to soil fertility measures that feed growing plants, we have too often adopted the practice of "crop hunting" in the mistaken belief that when one crop starves another can be found that will thrive on the same depleted land. But we can't breed crops against starvation any more than a sterile parent can transmit the character of sterility.

Evidences of declining soil fertility are seen in the greater number of deficiency diseases among our farm animals. Veterinarians are constantly faced with increasing cases of strange animal ailments for which no specific body weakness or visible physiological cause can be found. Eye ailments, a tendency to blindness, bad gaits, rounded back lines, inferior condition, poor feeding progress, and even debility and death can be traced to deficiencies in animals' nutrition.

If newer legumes or non-legumes grow more successfully on less fertile land, then such crops must be taking less nutrient from the soil. Thus these crops can offer the animals that feed on them less of protein and of ash which, for animals the same as for plants, are the items drawn from the soil.

# Animals Limited in Feeding.

Confined as they are, animals are limited in their feeding by the soil fertility of the farm. Supplements such as proteins contain too little of the minerals needed. And when animals protest by rooting up the very earth or climbing the fence in search of better forage, such actions are met by rings in the nose or cumbersome yokes about the neck. Human serfs have been prohibited in this country for about 75 years, but animal slaves can be seen on any trip through the country. Too often they are almost in a state of starvation because their master, the farm owner, neglects his soil fertility.

Our soils must become factories instead of continuing as mines from which the fertility is unendingly drawn. Raw materials such as limestone, phosphorus, potash, and other fertilizing elements, organic matter and other plant nutrients must go back into the soil. In our "soil factories" we must produce more usable nutrients for plant service. Such nutrients must not be hauled off unless equal amounts are re-

# Consumption of Fats, Oils

Recently the United States used approximately 61/2 billion pounds of fats and oils in edible products; two billion in soaps, one billion in paints, varnishes, printing inks and linoleum products, and 0.5 billion was used for a variety of industrial pur-

# **Cutting Costs**

Two Floyd county, Texas, farmers have been showing their neighbors the

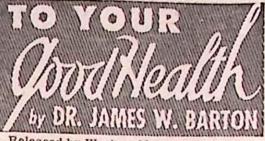

value of this kind of joint action. These Farm Security administration borrowers first bought a tractor outfit

together in 1940. Sharing the \$1,030 outlay and the operating expenses proved to them the advantages of partnership.

Their second enterprise was buying a pure-bred Jersey bull. which cost \$150. Then they bought a seven-foot power-take-off mower, a feed mill mounted for transport, and a ground-driven row binder.

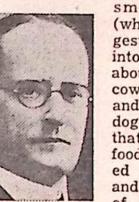

The two farmers say that the machinery they joined in buying saved their crops last fall. They figure that what they did as a common sense plan will have to be done by others from sheer necessity.

Released by Western Newspaper Union.

#### PROPER FOOD

At the Chicago World's fair, in the medical building, was the preserved digestive tract of a cow, of a man, and of a dog. The length of the

Dr. Barton

small intestine (where food is digested and absorbed into the blood) was about 40 feet in the cow, 20 feet in man, and five feet in a dog. This means that in the cow the foods partly digested in the stomach and in the first part of the small intestine, have a long distance to travel

while being absorbed into the blood through the lining surface of the small intestine. Thus food not digested and absorbed in the first few feet will be digested and absorbed by this long surface of the intestine before it reaches the large intestine into which wastes or undigested food is emptied.

In man, food, with just 20 feet of small intestine, through which to pass, must be absorbed in less time.

In the dog, with only five feet of small intestine through which to pass, even less time is given for the food to be digested and absorbed into the blood.

What do we learn from a study of the intestine in man, the cow and the dog?

As the cow has such a long intestine it can eat bulky, hard, cellulose food, because the stomach, small and large intestine are able to handle this type of food such as grass, hay and raw vegetables with roughage.

The dog, not being equipped with a large and long digestive tract, cannot handle bulky, rough or cellulose foods and so must eat a rich

or concentrated food such as meat. What about man? Should he eat the rough, hard to digest food of the cow, or the concentrated, more easily digested food of the dog? His small intestine, far shorter than that of the cow and longer than that of the dog, gives us the answer. He must eat less of the food eaten by the cow, and more of the food eaten by the dog, not in amounts but in proportion to his size and weight, as compared with the cow and the dog.

As a matter of fact, man has worked out this food question correctly in that the food recommended for man is one part meat to two parts fats to four parts starches, vegetables and fruits.

# Persistent Cough May Be Sinusitis

As a youngster in the lower grades in school I can remember certain students in the class who always seemed to have a head cold with running nose. The discharge was not watery but thick mucous and sometimes what I now know must have been "yellow" pus.

No effort was made in those days to send the child home or to separate him from the rest of us; because a cold was considered a harmless condition as far as the child or others were concerned.

Today we know that these youngsters who "always" have a cold, have, in most cases, an infection in one or more of the sinuses and the condition is really sinusitis.

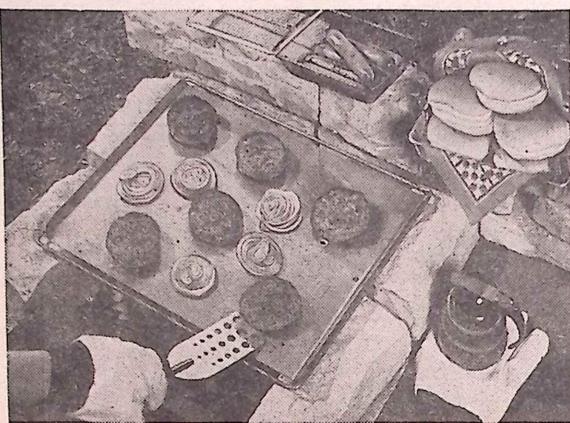

When a youngster has an acute cold it is often just in the nose and throat itself with little or no disturbance of any sinus. There is usually some watery or mucous discharge from the nose and throat and some cough present.

However, "coughs lasting more than two weeks are due to sinus infection unless proved otherwise." The acute cold usually lasts about a week-two days onset, two days acute symptoms, and about two days clearing up. The child or adult with an acute cold does not "suffer" much but must be careful as to rest, diet, and exposure to cold and drafts, so that a simple cold will not develop into pneumonia or bronchopneumonia.

Sinusitis, on the other hand, gets the patient down, physicially and mentally. There is weakness, persistent cough, lack of appetite with loss of weight.

How can it be known if there is a chronic sinus condition present? In the New York State Journal of Medicine, Dr. G. M. Coates states that the usual symptoms are frequent nose colds, with discharge of mucous into the back of the throat. The lining membranes of the nose are inflamed and X-rays show a thickening of the lining of the sinuses.

These Babecued Hamburgers Are Appetite-Tempting! (See Recipes Below.)

#### Outdoor Fun

The delicious aroma of meat cooking over a crackling fire, toasted

buns, and freshly roasted corn or potatoes in the embers—all these make for plenty of summer fun. Toss together your outdoor cooking equip-

ment, bright, gay colored cloths, napkins, and gather some wood for your picnic. Plan to have lots of hearty, nourishing food to give your picknickers so they will have plenty of that upand-at-them spirit.

Crunchy green salads packed in jelly glasses or paper containers, steaming hot coffee, baked beans, or macaroni and cheese, and barbecued meat. Dispel the chilliness of cool nights with your picnic outdoors.

Hamburgers are old favorites, but you can make them extra delicious by drizzling a tasty barbecue sauce over them while they cook.

# \*Barbecued Hamburgers.

(Serves 8) 2 pounds ground beef

- 11/2 teaspoons salt
- Pepper to taste 2 tablespoons vinegar
- 1 tablespoon flour
- 1 teaspoon chili powder 2 teaspoons brown sugar
- 2 teaspoons salt
- 1/8 teaspoon pepper
- 1 medium-sized onion, chopped 11/2 tablespoons Worcestershire sauce
- ½ cup catsup 1 tablespoon hot water

Have any of the thriftier cuts of beef ground-such as chuck, flank,

shank, neck, or heel of round. If meat is quite lean, ask your butcher to grind in some suet. Mix meat thoroughly with salt and pepper. Cook on a greased griddlegrill with thick slices of onion.

Mix rest of ingredients well and drizzle over hamburgers as they cook. This sauce is also excellent over frankfurters which have been pricked with a fork.

# Lynn Says:

For best results in outdoor cooking use a small fire. Be sure you have a deep bed of coals before you start broiling or frying your food.

To start the fire, use a soft quick burning wood like pine, spruce, hemlock, laurel, poplar, or aspen. For a good bed of coals, use a hard wood such as maple, oak, ash, beech, birch, hickory, or any available hard wood in your community.

Seasoned wood which has not lain on the ground long enough to become wet or rotted, but long enough to dry out, is best for fires. Wood without bark makes the best kind of fire, as bark will cause a fire to smoulder. To start a fire more easily, use split wood, as it burns more easily than

round logs. You won't be a sissy if you kneel when using a hand axe for chopping or splitting wood. If you use seasoned wood, it can easily be broken into convenient chunks for the fire.

Barbecue Supper \*Barbecued Hamburgers Toasted Buns Weinies Mustard Chili Sauce Relish \*Roast Corn or \*Roast Potatoes Fresh Fruit or Berries

\*Marshmallow Dessert Coffee or Honey Lemonade Recipe Given

Hamburger Puffs. (Serves 8) 2 pounds chuck steak, ground

- cups grated raw potato tablespoons grated onion
- 2 teaspoons salt
- 1/4 teaspoon pepper

1/2 peeled clove of garlic, minced 4 tablespoons milk 4 tablespoons fat

Combine all ingredients except fat. Form into 16 patties. Cook in fat on a greased grill or skillet over medium heat until brown on both sides and done. About 5 or 6 minutes on each side is enough.

\*Roast Corn. Have a hot fire and let it burn

down until there is a good pile of red embers. Soak the ears of corn in their husks until good and wet and lay them, still in the husks, in the hot ashes. Bake for 30 minutes or until corn is tender. Turn the ears occasion-

\*Roast Potatoes.

Bury potatoes in hot ashes and roast as you do the corn, until they are tender. They take longer to roast than the corn. Serve with lots of butter, salt, and pepper.

\*Marshmallow Dessert. (Serves 6) Small bars of plain chocolate 12 graham crackers

12 marshmallows Toast 2 marshmallows over the coals to a crisp, gooey state, and then put them inside a graham cracker and chocolate bar sandwich. The heat of the marshmallow between the halves of chocolate bar will melt the chocolate just enough, and the graham crackers on the outside are nice to hold.

Do you like to go primitive and roast meat over a forked stick or long-handled fork? Then, you'll like:

Kabobs. For each person, allow 1/4 pound round steak, ½ of a medium-sized onion, and a few slices of bacon. Cut the meat in 1-inch squares, cut the onion lengthwise, from top to bottom. Cut the slices of bacon into thirds. Place beef, onion, and bacon on a fork or stick, alternately, and broil over coals until done. A salad that is both health-

crammed and delicious for a picnic is this one made with plenty of vegetables and cottage cheese: Vitamin Salad. (Serves 6)

1 cup celery, diced 2 cups cottage cheese 1/2 green pepper, diced 1 cup carrots, shredded (cooked) 2 cups cabbage, shredded fine 1/2 cup mayonnaise Toss together all ingredients and

serve on crisp lettuce leaves. Why get hot and bothered over your cooking and household problems when you can get expert advice on them? Write, explaining your problem to Miss Lynn Chambers, Western Newspaper Union, 210 South Desplaines Street, Chi-

cago, Illinois. Please enclose a stamped, self-addressed envelope for your reply. Released by Western Newspaper Union.

# Oldest National Flag

The Netherlands' flag of red, white and blue is said to be the oldest of all national flags. It dates back to 1354, when the colors of Holland and Bavaria were combined. That flag is still the official ensign for both the Dutch navy and the merchant fleet.

More than 20 nations are said to have gotten their flag ideas from the Netherlands' emblem. And the city of New York, first settled by the Dutch, just changed the red to yellow before adopting the ensign completely.

One thing a soldier is afraid of is a display of emotion. That's why his slang so often sounds derogatory. For example, he refers to the silver eagles on his colonel's shoulder straps as "buzzards." But when he speaks of his favorite cigarette, he says: "Camels." They're first with men in the Army as well as with Sailors, Marines, and Coast Guardsmen. (According to actual sales records in service men's stores.) A gift of a carton of Camels is always well received. Local tobacco dealers are featuring Camel cartons to send to any member of our armed forces. Hint for the day: Send "him" a carton of Camels .- Adv.

# Spirit of First 4th Will Give New Note to Independence Day

# Fourth of July Celebration to Be Worldwide in Scope This Year

# By CHARLES A. SINGLER

Released by Western Newspaper Union.

"You write it," said John Adams to Thomas Jefferson, "for you wield a pen ten times more eloquent than my own." And Thomas Jefferson wrote it.

That was 166 years ago. But today the Declaration of Independence gleams among the literary jewels of the world through the sheer beauty of its phrasing and the human dignity for which it stands.

Thomas Jefferson at that time, in the year of grace, 1776, was a young man of 33, known for his clarity of expression and ability as a writer. How well he wrote all the world now knows.

In that hall in Philadelphia, learned and courageous men pledged "their lives, their fortunes and their sacred honor" that we might be a free nation. Surely enough, the men who signed the Declaration of Independence risked their fortunes, to say nothing of their lives, for those indeed were perilous times. King George of England was not disposed to treat lightly the matter of disloyalty to the crown. "We must all hang together," Benjamin Franklin had said, "or we will all hang separately." But he knew when he said it that it was no joking matter, although millions have had a good laugh since then at the wittiness of his remark.

#### That First Fourth.

The Fourth of July, 1776, was a hot, sunny day, and in the afternoon a thunderstorm broke. Although the Declaration was adopted on the fourth, it was not engrossed until some weeks later. The announcement of the Declaration created a restrained enthusiasm, tempered by a knowledge of the gravity of the step. In this respect it closely resembled our own Declaration of War against Japan, and then against the entire Axis, when a peace loving nation, fully in accord with these declarations of war, waited tensely for developments.

The document was proclaimed to the people in the state house yard on July 8. At the same time the liberty bell was rung to summon the populace. Within a few weeks after the great bell tolled, King George's army under General Howe was hovering uncomfortably close, and soon thereafter the long and bitter chapters of the Revolutionary war were being written in privation, blood and heroism.

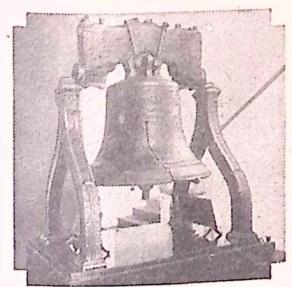

The first publication of the historical document was on July 8, in Dunlap's Pennsylvania Packet. Other printed copies appeared in Newport, Boston and Salem.

# A Symbol of Freedom.

The big bronze bell with the familiar rent in its side has been the symbol of liberty and free expression to countless millions of Americans since the new republic embarked on its perilous enterprise in the year 1776. The crack came into the bell when it tolled the funeral of Justice Marshall in 1835. In the raised letters which adorn its crown it is proclaimed that the bell was cast by Pass & Stow in the year 1753 by order of the Assembly of the Province of Pennsylvania for the new state house "erected shortly before in that city." However, the great bell could make other claims. It could claim-but it does not-that it was the first bell turned out in an American foundry.

This, then, is the background in which the first Independence day was cast, and all should be familiar with it. The spirit of liberty which glowed from the pages of the immortal Declaration has been the guiding star of the American people from that far day to this. The pattern of liberty which was fashioned then has been woven into all of our institutions, as well as into our

# Rings Again

The famous old Liberty Bell which announced the Proclamation of the adoption of the Declaration of Independence on July 4, 1776.

speech and our everyday lives. Liberty is an essential part of all of us. We draw it in with the very air we breathe.

It is inconceivable that a country nurtured in these fine traditions could ever accept the yoke of a foreign power, or that the flame of liberty should ever burn out on these shores. Those who in their arrogance thought that it might planned badly indeed.

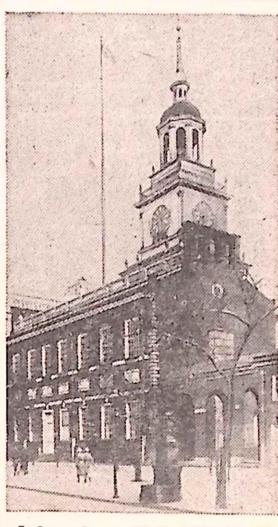

### Liberty Bell Rings Again.

And so the liberty bell has rung again. Its first reverberations were heard from the U.S.S. Augusta, in the North Atlantic, at the time the Atlantic Charter was written. The bell pealed still louder when America entered the war. But this time its reverberations were heard throughout the world, guaranteeing to all peoples that freedom which is the divine heritage of all.

This Fourth of July will differ, both in celebration and in spirit, from other Fourths of many years past. Once more America is at war, but this time we fight not alone for our own liberty but for the liberties of conquered countries and for those nations whose liberties are threatened by the aggressor nations.

### The Changing Times.

The fishing trips and the basket picnics of last Fourth and earlier 'Cradle of Liberty'

Independence Hall, Philadelphia, Pa., home of our Liberty Bell.

their liberty to the efforts of America and the other United Nations engaged in the struggle for world freedom.

# A 'Quiet Fourth' Expected.

Indications now point to the quietest Fourth in many years. Regulations issued last March by the Federal Explosives Control act placed a ban on the sale of fireworks and "torpedoes" of the fireworks variety. The measure was designed to save materials needed for munitions and at the same time lessen the danger of fires.

However, this ban has been somewhat modified since then to dispose of stocks on hand. Amended regulations forbid giant crackers and rockets of the "super-duper" variety but allow manufacture and sale of firecrackers not more than five inches long, of torpedoes containing less than five grains of explosives, and all other works within specified size

During the motoring years that stretch behind us the Fourth has Fourths will largely be converted been marked each year with a great this year into trips to training camps | flux of auto travel from city and

This Fourth of July will find American boys celebrating the Declaration of Independence on many fronts throughout the world. Picture shows a group of typical U. S. fighting men who are manning our Caribbean defenses. They are equipped with modern Garand rifles and wearing mosquito helmets. These finely conditioned men are experts in "bush" warfare.

sailors, marines and airmen in-themaking. Millions who formerly sought pleasure in countless ways in city or country will find strange new delight in wielding the hoe or pushing the cultivator in victory gardens all over the land. Many, too, will glean with pride and satisfaction some of the agricultural rewards of early springtime efforts, to be placed on the Fourth of July table. For never before in the history of our country has there been such a trend towards "grow your own" as in the spring of 1942.

Thousands of boys who celebrated last Fourth in the traditional American way will celebrate it this year in foreign lands. In Iceland, in China, Ireland, Australia and 26 other outposts of our far-flung battle front the Declaration will be duly celebrated. On aircraft carriers, battleships, cruisers, destroyers, subs and minesweepers, on PT-boats and flying fortresses, tribute will be paid to that first grand Fourth of July. And it won't be done with firecrackers!

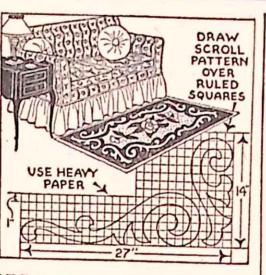

Widening Range of the Fourth. While the Fourth of July has been a major American holiday from time immemorial, it has been strictly an American holiday with little more than passing press notices in foreign lands. However, there is reason to believe that those countries which are not under the Nazi as never before. It may even bevictory is won, at least in those Axisdominated countries who will owe of noise they were able to make.

throughout the land to visit soldiers, | country and vice versa. This year, however, the scene will change considerably because of the rationing of tires and gas. Hundreds of workmen who have been accustomed on the Fourth to drive far into the country will spend this Fourth bending over lathe machines or putting TNT into shells to whittle down the Axis. Auto fatalities which usually reach the year's peak over the Fourth of July holiday will probably be much lower this year.

# A Happy Day for Children.

The Fourth has been one of the happiest days of the year for children in the past. However, it must be admitted that the Fourth of July during these later years has become mainly a holiday for the children, and the larger significance of the day has been lost in the rat-a-tat of the firecracker and the boom of the rocket with its spray of colored fire and stars against the darkening evening sky. How the children have pestered their parents around this time to break down all restraints and resolutions for a "safe and sane Fourth" and yield to their implorings to buy them "just a few crackers before they are all sold out!" The celebration for years has started around the middle of June. One could always tell that the Fourth was just around the corner by the crack of firecrackers or the boom of cannon-crackers-noises that would heel will hail the Fourth this year have shocked us into investigation a few weeks earlier. Boyish celecome an international holiday after brants were everywhere, and measured their patriotism by the amount

X/OMEN today are not the first to discover a war-time shortage of floor coverings. The glowing Oriental rugs of the Colonial mansion ceased to be imported during the Revolution; and the simple hooked rug made from old clothing began to be developed in more elaborate designs.

Then, as now, scroll borders around a flower motif were popular. The posies were designed according to individual taste but scroll patterns went the rounds of neighbors who traced the patterns on the burlap or canvas rug foundation. Today wax crayon is generally used for tracing. You will

# 

When bed sheets become worn, pillowcases may be made from the best portions. Seams may be sewed at the sides, if necessary.

Leather never should be cleaned with gasoline, naptha or any hydrocarbon solution. They dissolve and remove all the essential fats in the leather, leaving it dry and harsh.

Before working in the garden, put soap under and around your finger nails. You will find them much easier to clean.

If strawberry jam should sugar, mix it with two parts of cooked rhubarb to the one of jam, cook together for a few minutes and you will have an excellent pie filler, cobbler filler or sauce.

To remove finger marks around a doorway, use a cloth dipped in kerosene and then wipe with a cloth wrung out of hot water.

If the sewing machine needle will not penetrate heavy canvas, try rubbing the canvas where it is to be sewn with a piece of soap.

When ironing puffed sleeves, fold the sleeve in halves, pulling apart as it sticks. In this way you can get down into the gathers at the top. Iron it dry and you will have a pretty puffed sleeve when it is done.

find it easy to make a cut-out pattern by first ruling paper into oneinch squares and then copying the curves in the sketch.

NOTE: If you wish to make a scroll pattern be sure to clip this diagram and save it as it is not in any of the booklets which Mrs. Spears has prepared for readers; however, Book 5 contains two designs and directions for making original designs. To get a copy, send your order to:
